Summary

Software Developer with over 2 years of experience, specializing in high-performance web applications. Skilled in Front-End React and Full-Stack Development, consistently enhancing performance and user satisfaction, seeking to contribute expertise and join a dynamic team.

Work Experience

NetRoots Technologies, Lahore, Punjab, Pakistan

Oct 2023 – Jun 2024

Front-end React Developer

- Developed a safety management platform inspired by SafetyCulture, achieving a 25% improvement in page load times by optimizing React components and leveraging Material UI and Tailwind CSS for responsive design.
- Integrated and tested RESTful APIs, improving data retrieval speed by 30%, using Postman for seamless client-server interaction.
- Implemented Firebase Cloud Messaging (FCM) for real-time notifications, increasing user engagement by 15%.
- Managed version control using Git and SourceTree, stream team collaboration and reducing merge conflicts.

EHCT Solutions, Gujranwala, Punjab, Pakistan

Nov 2021 – Sep 2022

Junior Software Developer

- Contributed to an internal dashboard project, reducing development time by 20% through efficient React component development and API integrations.
- Integrated RESTful APIs, improving real-time data updates, enhancing user interaction across the platform.
- Assisted in writing unit tests, ensuring component stability and reducing post-release bugs.

Skills

Front-end: React, JavaScript, HTML/SCSS, Tailwind CSS, Bootstrap, Material UI, Framer Motion, Redux, Vite

Back-end: Node.js, Express.js, MySQL, Firebase, JWT (JSON Web Tokens), REST APIs, Socket.io API Development

Dev Tools: Git, GitHub, VS Code, Postman, Jira, Jest, Docker, Webpack, SourceTree, Netlify, Figma, Adobe Creative Cloud

Development Methodologies: Agile (Scrum, Kanban), Software Engineering Principles, Programming, Debugging

Education

GIFT University, Gujranwala, Punjab, Pakistan

Oct 2017 – Oct 2021

Bachelor's Degree in Software Engineering

CGPA: 3.27/4

Relevant Coursework: Object-Oriented Programming (OOP), Data Structures & Algorithms, Database Systems, Software Design & Architecture, Software Quality Engineering, Operating Systems, Network Fundamentals, Web Development & Computer Graphics, Software Project Management

Projects ([More on GitHub](#))

- **Interactive Dock Component (GitHub):** Built a Notion-inspired macOS Dock with React, Tailwind CSS, and Framer Motion. Featured dock renders with icons that can be magnified, reordered, and have multiple shapes.
- **Website Change Monitor (GitHub):** The tool made with React, and Express.js, allows users to specify URLs and automatically detects changes in the webpage's content such as tracking product prices, monitoring updates.
- **Payment Trading System (GitHub):** Developed a full-featured payment trading app with user registration, fund management, referrals, and role-based access for clients and admins, using JavaScript, Node.js, Express.js, MySQL, and SCSS for smooth database handling and UI.
- **Computer Sciences (GitHub):** Friendly projects via Microservices, ASCII Binary, JavaScript, Python, Bash, and Bat.
